

World Health Organization International Healthy Cities Conference

1 – 4 October 2018, Waterfront, Belfast, Northern Ireland

Changing cities to change the world

Celebrating 30 years of the Healthy Cities movement

Programme - Programme is subject to change

Sunday 30 September 2018

19.00 Sunday 30 September 2018

19.00 – 21.00: Registration, Waterfront Hall, Riverside Entrance

Monday 1 October 2018

7.00 Monday 1 October 2018

7.00 – 9.00: Registration, Waterfront Hall, Riverside Entrance
Music by Blackthorn

8.30 Monday 1 October

Conference Chair: Monika Kosinska, Programme Manager, Division of Policy and Governance for Health and Well-being, WHO Regional Office for Europe

Master of Ceremonies: Brendan Mulgrew

**8.30–10.00: Business meeting: WHO European Healthy Cities business meeting
Belfast Waterfront, Auditorium**

Russian, Spanish and Turkish translation available

*Welcome opening: Kate Nicholl, Councillor, Chair, People & Communities Committee, Belfast
Co-Chair: Monika Kosinska, Programme Manager, Division of Policy and Governance for Health and Well-being, WHO Regional Office for Europe*

*Co-Chair: David Stewart, Chair, Belfast Healthy Cities
Close of Phase VI and preparation for Phase VII of the WHO European Healthy Cities Network*

(Open to all delegates; voting restricted to members of the WHO European Healthy Cities Network in Phase VI)

10.00 Monday 1 October

10.00–12.30: Side event

Delegates will leave Belfast Waterfront, city side entrance at 10.00am to travel to Side Events. Delegates not attending the Business meeting should go directly to their chosen Side Event venue.

Refreshments will be available on arrival at each side event

10.30 – 12.30: Side Events

<p>1. Adverse Childhood Experiences: A trauma-informed approach to early years</p> <p>Welcome: June Wilkinson, Department of Education, Northern Ireland</p> <p>Venue: Belfast Central Library, Royal Avenue, Belfast</p>	<p>2. Healthy stadia: The contribution of sports venues to health & wellbeing</p> <p>Welcome: Michael Boyd, Director, Irish Football Foundation</p> <p>Venue: National Football Stadium at Windsor Park, Donegall Ave, Belfast</p> <p>Lunch provided</p>	<p>3. Technology and innovation to support active and healthy ageing</p> <p>Welcome: Richard Pengelly, Permanent Secretary, Department of Health</p> <p>Venue: Assembly Buildings, 2–10 Fisherwick Place, Belfast</p> <p>Lunch provided</p>	<p>4. Ageing in Place Insights from recent UK-Brazil Research</p> <p>Welcome: Elizabeth Mitchell, Belfast Healthy Cities</p> <p>Venue: City Hall, Belfast, Donegall Square, Belfast</p>
--	---	--	--

<p>5. Better Bedford Street</p> <p>Welcome: Richard Kirk, Director, Institution of Civil Engineers, Northern Ireland</p> <p>Venue: Ulster Hall, 34 Bedford Street, Belfast</p>	<p>6. Building sustainable, healthy and equitable cities</p> <p>Welcome: Nigel McMahon, Chief Environmental Health Officer, Northern Ireland and Paul Wilkinson, London School for Hygiene & Tropical Medicine</p> <p>Venue: PRONI (Public Record Office of Northern Ireland) 2 Titanic Boulevard, Titanic Quarter, Belfast</p>	<p>7. Northern Ireland's journey towards or away from peace</p> <p>Welcome: Jacqueline Irwin, Community Relations Council, Northern Ireland</p> <p>Venue: Linenhall Library, 17 Donegall Square North, Belfast</p>	<p>8. Health Promoting Schools in Healthy Cities</p> <p>Welcome: TBC</p> <p>Venue: TBC</p>

Side Event presenters

Side Event 1: Adverse Childhood Experiences: A trauma informed approach to early years

Welcome, June Wilkinson, Department for Education Northern Ireland

Chair: Maurice Meehan, Head of Health and Social Wellbeing Improvement, Public Health Agency

*A Strategic View to addressing Adverse Childhood Experiences in Northern Ireland
Maurice Leeson, Health and Social Care Board, Northern Ireland, United Kingdom*

*Early Intervention Transformation Programme: Trauma Informed Practice
Helen McKenzie, Safeguarding Board for Northern Ireland*

*Building Resilient Communities – Cross Boarder CAWT MACE Project
Maurice Meehan, Public Health Agency, Northern Ireland*

*A public health approach to ADVERSE Childhood Experiences in Scotland – from evidence and policy to action in communities
Katy Hetherington & Tina Hendry, National Health Service Scotland, United Kingdom*

Side Event 2: Healthy Stadia: The contribution of sports venues to health and wellbeing

Welcome to Windsor Park, Michael Boyd, Director, Irish FA Foundation

Chair: Matthew Philpott, Executive Director, Healthy Stadia

*Background to European Healthy Stadia Network & Developing Partnerships
Dr Matthew Philpott, Executive Director, Healthy Stadia*

*Sport, Health and Wellbeing in Northern Ireland – Good Practices from the Governing Bodies of Sport
Ian Stewart, Irish Football Association Foundation; Colin Regan & Aoife O'Brien; Gaelic Athletic Association
Healthy Clubs Programme; Dr Michael Webb, Medical Director, Ulster Rugby*

*An evidence-based approach to tackling physical inactivity in male football fans – The EuroFIT Programme
Prof Sally Wyke, University of Glasgow & Principle Investigator for EuroFIT*

*Union of European Football Association's Commitment to Social Responsibility and Healthy Lifestyles
Iris Hugo-Bouvier, Football and Social Responsibility, UEFA*

Dr. Julianne Williams, WHO European Office for Prevention and Control of Noncommunicable Diseases

Side event 3: Technology and Innovation to support active and healthy ageing

*Welcome: Richard Pengelly, Permanent Secretary, Department of Health, Northern Ireland
Manfred Huber, Coordinator, Healthy Ageing, Disability and Long-term Care
WHO Regional Office for Europe*

Chair: Mark Lee, Director of Primary Care, Department of Health, Northern Ireland

Discussant: Elaine Colgan, Head of eHealth and European Engagement, Department of Health, Northern Ireland

Use of technology in supporting older people

Jaime Ruiz Serra, Head of Telecare Centre, Malaga

Alistair Hodgson, Policy and Strategy Lead, Digital Health and Care, Scottish Government

Paulina Kämäräinen, Project Manager, City of Kuopio, Finland

Asst. Prof Rina Patramanon, Department of Biochemistry, Khon Kaen University, Thailand

Showcase cross Reference Sites collaboration successes in Medicines Optimisation and innovation

Anita Hogg, Lead, Medicines Optimisation Innovation Centre, Northern Ireland

Mireia Massot Mesquida, Catalan Centre of Health

Innovative Procurement using Small Business Initiative (SBRI)

Eoin McFadden, Innovation and Specialisation, Department for the Economy, Northern Ireland

Cathy Harrison, Senior Principal Pharmaceutical Officer, Department of Health, Northern Ireland

Julie-Ann Walkden, Small Business Research Initiative (SBRI) Executive, Health and Social Care, Northern Ireland

Side event 4: Ageing in Place Insights from recent UK-Brazil Research

Welcome, Elizabeth Mitchell, Belfast Healthy Cities

Chair: Elizabeth Mitchell, Belfast Healthy Cities

Age Friendly Cities in Europe

Professor Geoff Green, Sheffield Hallam University

Introduction to research projects and key questions on healthy ageing in an urban context

Professor Geraint Ellis, Queens University Belfast

Emerging results from 'Place-Making with Older Adults: Towards Age-Friendly Communities'

Dr Ryan Woolrych, Heriot-Watt University

Emerging findings from the Healthy Urban Living and Ageing in Place' Project

*Professor Rodrigo Reis, Washington University in St Louis, USA and Pontifical Catholic University of Parana, Brazil
(by video conference from Brazil)*

Translating research into policy and practice issues of knowledge exchange

Dr Jenny Fisher, Manchester Metropolitan University

Side event 5: Better Bedford Street

Welcome, Richard Kirk, Institution of Civil Engineers

Creating Living Places

Andrew Haley, Chair of the Ministerial Advisory Group for Architecture and the Built Environment, Northern Ireland

Why Better Bedford Street?

Angus Kerr, Chief Planner, Department for Infrastructure, Northern Ireland, United Kingdom

Learning as we go

Amberlea Neely, Planning Landscape Architecture Community Environment (PLACE)

Side event 6: Building Sustainable, Healthy and Equitable Cities

Welcome from Northern Ireland

Professor Nigel McMahon, Chief Environmental Health Officer, Department of Health Northern Ireland

Chair, Welcome and opening remarks

Professor Paul Wilkinson, London School of Hygiene & Tropical Medicine

Complex Urban Systems for Sustainability and Health

Professor Mike Davies, University College London

Supporting transformative change

Mehrnaz Ghojeh, C40 Cities Climate Leadership Group

Politics and complexity in advancing an urban health agenda

Professor Susan Parnell, University of Bristol

Working with policymakers

Charlotte Marchandise-Franquet, City of Rennes

Designing cities for people
Professor Jonathan Patz, University of Wisconsin-Madison

Side event 7: Northern Ireland's Journey Towards or Away from Peace

Chair: Peter Osborne, Chair, Northern Ireland Community Relations Council

Welcome and introduction
Jacqueline Irwin, CEO, Northern Ireland Community Relations Council

Northern Ireland Peace Monitoring report 2018
Gillian Robinson, Ulster University

Panel members
Adrian Guelke, Emeritus Professor in the School of History, Anthropology, Philosophy and Politics at Queen's University Belfast
Gillian Robinson, Author Peace Monitoring Report, Ulster University
Judith Thompson, Commissioner, The Commission for Victims and Survivors
Koulla Yiasouma, Northern Ireland Commissioner for Children and Young People

Side event 8: Health Promoting Schools in Healthy Cities

Goof Buijs, Manager United Nations Educational, Scientific and Cultural Organization (UNESCO) Chair Global Health & Education
Annette Schulz, Schools for Health in Europe network

12.30 Monday, 1 October 2018

12.30–14.00: Lunch, Belfast Waterfront, Hall 1 (all delegates unless otherwise stated)

14.00 Monday, 1 October 2018

14.00–16.00: Plenary 1: Primary healthcare, health service delivery and the local level – where do we go from here?

Auditorium
Russian, Spanish and Turkish translation available

The plenary will be built around the three key anniversaries of 2018 relevant to the conference: 30 years of healthy cities, 70 years of the United Kingdom National Health Service, and 40 years of the Alma Ata Declaration on Primary Healthcare. Through the framing of the Copenhagen Consensus of Mayors: Healthier and Happier Cities For All and its six themes (People, Place, Participation, Prosperity, Planet, and Peace), the session will focus on the role of the local level and cities in delivering and ensuring primary healthcare and service delivery, including their role in ensuring universal health coverage in line with WHO's global target.

It will identify and address challenges and opportunities that cities and local governments face in relation to public health in the era of the UN 2030 Agenda for Sustainable Development.

Co-Chair: Monika Kosinska, Programme Manager, Division of Policy and Governance for Health and Well-being, WHO Regional Office for Europe

Co-Chair: Richard Alderslade, Senior Adviser, WHO Regional Office for Europe

Welcome from Belfast: Deputy Lord Mayor, Councillor Emmet McDonagh-Brown

Welcome from World Health Organization: Pirooska Östlin, Director, Division of Policy and Governance for Health and Well-being, WHO Regional Office for Europe

Speakers: John Ashton, Senior Adviser, WHO European Healthy Cities Network
Bauyrzhan Baibek, Mayor, Almaty, Kazakhstan
Oleg Chestnov, WHO Representative, Kazakhstan

Round Table members: Michael McBride, Chief Medical Officer, Northern Ireland
Gina Radford, Deputy Chief Medical Officer, England
Catherine Calderwood, Chief Medical Officer, Scotland
Chris Jones, Deputy Chief Medical Officer, Wales

16.00 Monday, 1 October 2018

16.00–16.30: Break

Parallel Session A

16.30–18.00 Strategic workshop A1: Place-making in the city: different experiences Hall 2B Spanish translation	16.30–18.00 Learning through practice A2: Health in all policies Auditorium Russian translation	16.30–18.00 Learning through practice A3: City policies for population and planetary health Hall 2A Turkish translation	16.30–18.00 Learning through practice A4: Promoting mental health and reducing suicides: urban strategies Room 1B
16:30–18.00 Learning through practice A5: Health: a key element of urban prosperity Room 2A	16.30–18.00 Learning through practice A6: Cultural activities: enhancing accessibility through collaboration Room 2B	16.30–18.00 Learning through practice A7: Second chance: empowerment through community-based learning Room 3A	16.30–18.00 Meeting A8: United Kingdom Healthy Cities Network meeting: preparation for Phase VII Room 3B

Parallel Session A: Presenters

Parallel Session A- 16.30 – 18.00 Monday 1 October 2018

A1: Place-making in the city: different experiences

Hall 2B - Spanish translation

This workshop has presentations on high streets, urban regeneration in deprived neighbourhoods and tales of ageing across four cities. But what do they have in common? They can all shed light on the experiences of healthy place-making in cities. The *Copenhagen Consensus of Mayors vision of Healthier and Happier Cities for All* highlights where place occupies a pivotal role between planet and people: linking human, social and urban development together.

Healthy places, settings and resilient communities are also one of five strategic directions agreed in the *Roadmap to implement the 2030 Agenda for Sustainable Development, building on Health 2020, the European policy for health and well-being* adopted by the Regional Committee for Europe in autumn 2017.

In this session, we invite attendees to discuss the action and experiences of healthy place-making in cities and renew a commitment to healthy place-making.

Chair: Marcus Grant, Senior Adviser, WHO European Healthy Cities Network
Discussant: Elisabeth Bengtsson, Gothenburg, Sweden

Abstract 135, Essen, Germany: Julita Skodra
Co-creating health-promoting neighbourhoods: urban regeneration of deprived neighbourhoods in metropolitan regions

Abstract 328, Dublin, Ireland: Sarah Gibney
Age-friendly environments and healthy and positive ageing in Ireland: a tale of four cities

Abstract 294, Glasgow, United Kingdom: Gillian Dick
Connecting nature – bringing life to cities, bringing cities to life

A2: Health in all policies

Auditorium - Russian translation

Developing a broad concept of health that is supported by all policy sectors within government is key to tackling major public health issues and address health inequalities among the population. A multisectoral approach to health requires giving priority to health in policies and sectors other than the health sector. The health in all policies approach aims to achieve just that. The health in all policies approach sets out to develop understanding of the main determinants of health across government departments on all levels of government while also encouraging coordinated actions. Such coordinated actions generate great potential for tackling the multifaceted health challenges societies face.

Chair: Fiona Donavan, National Healthy Cities and Counties of Ireland Network
Discussant: Milka Donchin, Israeli Healthy Cities Network

*Abstract 118, Utrecht, Netherlands: Miriam Weber
Health in all policies: lessons learned and next steps in Utrecht, Netherlands*

*Abstract 301, London, United Kingdom: Emily Humphreys and Fiona Wright (two speakers)
Developing London's Health Inequalities Strategy*

*Abstract 316, Sevenoaks, United Kingdom: Michelle Lowe
Well-being starts at home – how Sevenoaks District Council approaches public health*

A3: City policies for population and planetary health **Hall 2A - Turkish translation**

Current rates of urbanization in the world, particularly in cities in developing economies, make policy-makers face unprecedented challenges in dealing with environmental issues and associated public health risks. Existing urban infrastructure systems are often not able to cope with the increased demand placed on them as a result of high levels of population growth that are extremely difficult to manage. This problem persists particularly in informal urban settlement such as shantytowns. As a result, large numbers of people are exposed to poor environmental standards that harm both humans and the environment as a whole. Comprehensive and effective urban policies are needed to deal with these issues.

*Chair: Elia Diez, Barcelona, Spain
Discussant: Nigel McMahon, Belfast, Northern Ireland, United Kingdom*

*Abstract 203, London, United Kingdom: Michael Davies
Complex urban systems for sustainability and health: a structured approach to support the development and implementation of city policies for population and planetary health*

*Abstract 196, London, United Kingdom: Danielle Antonellis
Reducing fire risk in low-income and informal urban settlements*

*Abstract 96, Torres Vedras, Portugal: Ana Umbelino
Co-construction of a healthy city: meta-analysis of participatory processes for democratic governance*

A4: Promoting mental health and reducing suicides: urban strategies **Room 1B**

Poor mental health is an issue that affects increasing numbers of people across the globe, often leading to higher levels of reported instances of depression and suicides among the population. The associated direct and indirect costs for individuals and society as a whole are generally high, but few health strategies effectively deal with the problem of poor levels of mental health.

*Chair: Sandra Davies, Liverpool, England, United Kingdom
Discussant: Elizabeth Mitchell, Belfast, Northern Ireland, United Kingdom*

*Abstract 198, Espoo, Finland: Riikka Puusniekka
Integrating a positive mental health approach in local government strategic management in Espoo*

*Abstract 71, Rotterdam, Netherlands: Pascal Bisscheroux
Preventive mental health in Rotterdam*

*Abstract 141, Kaunas, Lithuania: Iveta Kučinskaitė
Implementation of Kaunas city suicide prevention model*

*Abstract 132, Belfast, Northern Ireland, United Kingdom: Sean Devlin, Jo Murphy
CareZone initiative – Oldpark (North Belfast)*

A5: Health: a key element of urban prosperity **Room 2A**

Policy-makers around the world increasingly recognize that urban prosperity should not be measured by economic indicators only and that public health indicators can act as a better measure of prosperity. Positive health and well-being outcomes are now often being used to promote cities as sustainable and attractive places to live and work. This renewed focus on health as part of the urban agenda merits innovative and integrated approaches to boosting public health.

*Chair: Brian Heading, Belfast, Northern Ireland, United Kingdom
Discussant: Michael Gibbs, Belfast, Northern Ireland, United Kingdom*

*Abstract 195, Stupino, Russian Federation: Alexander Ratsimor
Public health programme in the Stupino district, Moscow region*

Abstract 83, Turku, Finland: Karolina Mackiewicz

Participatory urban planning for healthier urban communities – how to engage sectors and city residents in developing cycling in cities

Abstract 155, Belfast, Northern Ireland: Satish Kumar, Behnam Firoozi Nejad, Steven Donnelly, Lekan Ojo-Okiji Abasi (four speakers)

Assessing the spatial correlations between prosperity and mental health in Northern Ireland

A6: Cultural activities: enhancing accessibility through collaboration **Room 2B**

Effective culture planning is often overlooked within urban policy due to the traditional giving priority to, for example, infrastructure and housing. However, cultural activities can play an important role in promoting people's well-being, particularly by boosting the social inclusion of socially isolated groups.

Chair: Tony Fitzgerald, Cork, Ireland

Discussant: Daniele Biagioni, Italian Healthy Cities Network

Abstract 54, Prague, Czech Republic: Jitka Bouskova

Culture planning in a healthy city – Czech inspirations: method of evaluating culture organizations and cultural facility mapping in the city

Abstract 13, Kuopio, Finland: Jonna Forsman

Culture Comes Along: developing cultural participation and social inclusion in the neighbourhoods in Kuopio, Finland

Abstract 56, Kuopio, Finland: Eeva Mäkinen

The Well-being Power Plant of Eastern Finland: advancing health, well-being and social involvement

A7: Second chance: empowerment through community-based learning **Room 3A**

Public health care can often be made more effective when people have the ability to recognize the early symptoms of disease. In addition, much can be gained by increasing knowledge among the general population about healthy lifestyles to prevent diseases from developing. This requires effective learning methods and ways of dissemination.

Chair: Charlotte Iisager Petersen, Danish Healthy Cities Network

Discussant: Geoff Green, Senior Adviser, WHO European Healthy Cities Network

Abstract 219, Brno, Czech Republic: Ivana Draholová

One lesson for saving life: implementing stroke and heart attack as a topic in an educational programme

Abstract 325, Cork, Ireland: Bernard Twomey

Sustaining a 10-year partnership between the community health and education sector

Abstract 248, Cork, Ireland: Denis Barrett

Learning neighbourhoods are healthy neighbourhoods

A8: UK Healthy Cities Network Meeting: preparation for Phase VII **Room 3B**

This session will discuss the future of healthy cities in the UK, looking at building on the long history and experience in the context of an evolving national and international landscape. It will focus on drawing on experiences from the work of the UK national network; challenges and opportunities for expanding the healthy cities approach in the UK; and strengthening the learning from other international healthy city networks as well as the healthy cities approach in the UK

Chair: Monika Kosinska, Programme Manager, Division of Policy and Governance for Health and Well-being, WHO Regional Office for Europe

Co-chair: David Buck, Senior Fellow, Public Health and Inequalities, The King's Fund, United Kingdom

Co-chair: David Stewart, Chair, Belfast Healthy Cities, Northern Ireland, United Kingdom

Moderator: Tamsin Rose, Senior Adviser, WHO European Healthy Cities Network

Speakers: Monika Kosinska, Programme Manager, Division of Policy and Governance for Health and Well-being, WHO Regional Office for Europe

Darren Crossley, Deputy Chief Executive, Carlisle City Council, United Kingdom

Chris Naylor, Senior Policy Fellow, The King's Fund, United Kingdom

Michael McBride, Chief Medical Officer, Northern Ireland, United Kingdom

Gina Radford, Deputy Chief Medical Officer, England, United Kingdom

*Catherine Calderwood, Chief Medical Officer, Scotland, United Kingdom
Chris Jones, Deputy Chief Medical Officer, Wales, United Kingdom*

18.30: Leave Belfast Waterfront to travel to Whitla Hall, Queen's University Belfast

19.00: Welcome reception, Whitla Hall, Queen's University Belfast
*Welcome dance by Artseka
Professor Ian Greer, Vice Chancellor, Queen's University Belfast*

Tuesday, 2 October 2018

7.15 Tuesday, 2 October 2018

7.15–7.45: Morning run: meet at Riverside Entrance, Belfast Waterfront

7.00–9.00: Registration, Riverside entrance, Belfast Waterfront
Music by Blackthorn

9.00 Tuesday, 2 October 2018

9.00–10.00: Official opening ceremony
*Belfast Waterfront, Auditorium
Russian, Spanish and Turkish translation available*

9.00 – 9.15: Welcome by Celtic Storm
*Welcome from Belfast: Dr Michael McBride, Chief Medical Officer, Northern Ireland, United Kingdom
The Lord Mayor of Belfast, Councillor Deirdre Hargey
Welcome from World Health Organization: (tbc)*

10.00 Tuesday, 2 October 2018

10.00–10.30: Break
Press conference, Boardroom 2

10.30 Tuesday, 2 October 2018

10.30–12.00: Plenary 2: Peace and participation
*Auditorium
Russian, Spanish and Turkish translation available*

This plenary session will be built around the Peace and Participation themes of the Copenhagen Consensus of Mayors: Healthier and Happier Cities For All. It will explore the role of cities in mobilizing the people within them to contribute to peaceful and resilient communities and societies, in particular in the aftermath of conflict or events that serve to fragment society. It will highlight mental health and the psycho-social elements of post-conflict reconciliation in urban environments, and explore the role of cities in ensuring, maintaining, and rebuilding peace through participation.

*Co-Chair: CEO Northern Ireland, United Kingdom tbc.
Co-Chair: tbc
Keynote and panel: tbc*

12.30 Tuesday, 2 October

12.30–14.00: Lunch, Harbour Commissioners Office (invitation only)
Music by Ruth Corry, Harpist

12.30–14.00: Lunch, Belfast Waterfront (all delegates)
Participatory Art, Hall 1

Parallel Session B

14.00–16.00 Learning through practice B1: Healthy city stories: around the world 1 Auditorium Russian translation	14.00–16.00 Strategic workshop B2: Planetary health: build- ing sustainable, healthy and equitable cities Hall 2A Turkish translation	14.00–16.00 Learning through practice B3: Ageing populations: support systems to live at home Room 1B	14.00–16.00 Learning through practice B4: Schools: key vehicles for improving children’s health outcomes Hall 2B Spanish translation

Parallel Session B: Presenters

Parallel Session B - 14.00 – 16.00 Tuesday 2 October 2018

B1: Healthy city stories: around the world 1 **Auditorium - Russian translation**

Healthy cities share a vision for urban health, in which cities put people and their health and well-being at the centre of all their policies and actions. Healthy cities have strong political leadership, are centres of good practice and are in a unique position to learn and share knowledge, insight and inspiration in a spirit of solidarity. This is the first session of three sessions that will highlight the progress that has been achieved as part of the last 30 years of the Healthy Cities programme.

Chair: Tania Radulescu, Bucharest, Romania
Discussant: Iwona Iwanicka, Polish Healthy Cities Network

Abstract 97, Horsens, Denmark: Ingunn Søndergaard Jacobsen
Horsens Healthy City – co-creating welfare for 30 years

Abstract 268, Sharjah, United Arab Emirates: Abdelaziz Al Mheiri
Sharjah: the first healthy city in the Eastern Mediterranean Region

Abstract 29, Bursa, Turkey: Murat Ar, Emine Didem Evci Kiraz (two speakers)
The story of healthy cities in Turkey

Abstract 313, Seixal, Portugal: Manuela Ferreira
Portuguese Healthy Cities Network: promoting health for 20 years

Abstract 342, Russian Federation: Tatiana Shestakova
Implementation of the WHO Healthy Cities project in the Russian Federation. Opportunities for cooperation

B2: Planetary health strategic workshop **Planetary health: building sustainable, healthy and equitable cities** **Hall 2A - Turkish translation**

This workshop will explore three interlinked challenges to building sustainable, healthy and equitable cities: reducing the environmental footprint, increasing resilience to environmental change and promoting and protecting health.

Speakers: Paul Wilkinson, London School of Hygiene and Tropical Medicine, England, United Kingdom
Mike Davies, University College London, England, United Kingdom
Mehrnaz Ghojeh, C40 Cities Climate Leadership Group
Susan Parnell, University of Bristol, England, United Kingdom
Charlotte Marchandise-Franquet, Rennes, France
Jonathan Patz, University of Wisconsin at Madison, United States of America

B3: Ageing populations: support systems to live at home **Room 1B**

Populations across the globe are ageing, particularly in developed economies, presenting new challenges for urban policy-makers. Larger numbers of older people with health needs lead to increased pressures on public health systems. Having older people live in their own home for longer by providing care at home is one way of relieving health facilities from some of the increased demands.

Chair: Mayor of Shenyang, China (tbc)

Discussant: Elizabeth Mitchell, Belfast, Northern Ireland, United Kingdom

Abstract 70, Kuopio, Finland: Tuula Hartikainen

Clinical coordination centre for acute mobile integrated social and health care: developing multiprofessional cooperation and communication in acute home care

Abstract 276, Kuopio, Finland: Pauliina Kämäräinen

Fostering healthy suburban community ecosystems by smart technologies for the ageing society in Thailand

Abstract 144, Glyfada, Greece: Evanthia Evangelou

Exploring the quality of life of the users of an open care centre for older people in the Municipality of Glyfada, Greece

B4: Schools: key vehicles for improving children's health outcomes **Hall 2B - Spanish translation**

Good childhood health and well-being are instrumental for improving educational attainment. In addition, a healthy childhood increases the prospect of good health and well-being during adulthood. Schools play a central role in children's lives and can therefore act as main drivers for promoting children's health and well-being.

Chair: John Ashton, Senior Advisor WHO European Healthy Cities Network

Discussant: Heini Parkkunen, Turku, Finland

Abstract 28, Swansea, United Kingdom: Emily Marchant

The HAPPEN Swansea project – the health and attainment of students in a primary education network.

Abstract 209, Matosinhos, Portugal: Mariana Ferreira

Tackling childhood obesity using setting-specific strategies for promoting health and well-being in preschools and public elementary schools in Matosinhos

Abstract 165, Riga, Latvia: Diāna Koerna

A comprehensive approach for preventing injuries among children

B5: Co-creation: approaches in shaping public health strategies **Room 2A**

Cities play an increasingly more prominent role than they did in the past when responding to societal challenges, including urbanization, ageing populations and climate change. To create effective public health strategies, new alliances and relations between partners within the city, but also between cities and regional and national authorities, have become indispensable.

Chair: Danny McQuillan, Belfast, Northern Ireland, United Kingdom

Discussant: Darren Crossley, Carlisle, England, United Kingdom

Abstract 61, Helsinki, Finland: Nella Savolainen

Regional well-being reports – a tool for strategic management in Finland.

Abstract 250, Utrecht, Netherlands: Hanneke Schreurs

Living Lab services promoting health in the community through participation*

B6: Improving air quality: creating healthy urban environments **Room 2B**

The adverse effects of human exposure to air pollution, both indoors and outdoors, is increasingly being backed up by solid evidence. This has led to a greater emphasis on preventing air pollution in a range of policy strategies in recent decades that aim to improve air quality both indoors and outdoors, ranging from source control to air-cleaning solutions.

*Chair: Dasy Papathanasopoulou, Hellenic Healthy Cities Network
Discussant: Geraint Ellis, Belfast, Northern Ireland, United Kingdom*

B7: Smart technologies: designing inclusive public health interventions **Room 3A**

Policy-makers have become increasingly aware of the need to engage the general population to be able to respond to future challenges in an inclusive way. Helping citizens to observe, understand and shape processes that adversely affect public health will ultimately lead to more effective policy choices. Smart technologies now provide new platforms to assist in this process.

B8: Using place to make a difference **Room 3B**

This session explores how place and healthy place-making can be used to make a difference to people's lives. "A healthy city leads by example, with the social, physical and cultural environments aligned to create a place that is actively inclusive, and facilitates the pursuit of health and well-being for all."

The quote above is from the Copenhagen Consensus of Mayors vision Healthier and Happier Cities for All (February 2018). This document sees designing urban places that improve health and well-being as key to what a healthy city needs to be engaged with. Healthy place-making is very much part of a fully integrated agenda. The WHO Regional Office for Europe developed a roadmap to assist Member States with implementing the 2030 Agenda for Sustainable Development, building on Health 2020. This roadmap proposes the establishment of healthy places, settings and resilient communities as one of five strategic directions. Enabling measures are: investment for health; multi-partner cooperation; health literacy, research and innovation and monitoring and evaluation. In this session, we want all attendees to think through the wide variety of approaches available for cities to explore and to implement.

*Chair: Carol Ramsey, Belfast, Northern Ireland, United Kingdom

Parallel Session C: Presenters

Parallel Session C- 16.30 – 18.00 Tuesday 2 October 2018

C1: Peace journeys: building resilient communities in Northern Ireland Auditorium - Russian translation

It has been 20 years since the Peace Agreement was signed that formally ended the Northern Ireland conflict. Although various peace-building programmes have since been introduced, the legacy of the conflict remains a challenge to be dealt with. Intercommunal strife and residential segregation based on community affiliation have not gone away. Initiatives that contribute to more positive community relations therefore still have an important role to play within Northern Ireland society

C2: Empowering older people: active participation for healthier lives Room 1B

Societies across the globe are ageing: it is estimated that by the middle of the century in many high-income countries, one third of the population will be 60 years or older. This anticipated increase in the number of older people

highlights the need to make sure that older citizens are included within the wider society and are less dependent on health facilities. Age-friendly planning and governance structures contribute to more active and healthier lifestyles for older people, thereby reducing pressure on the public health sector.

Chair: Pascal Bisscheroux, Rotterdam, Netherlands
Discussant: Manfred Huber, WHO Regional Office for Europe

Abstract 68, Belfast, Northern Ireland, United Kingdom: Elma Greer
Age-friendly Belfast – a brief overview

Abstract 192, Belfast, Northern Ireland, United Kingdom: Sylvia Moore
Greater Belfast Seniors' Forum – an innovative, intersectoral, participatory partnership advocating for the place of older people in our city, our peace and our prosperity

C3: Leaving no one behind: inclusive approaches towards universal well-being **Hall 2B - Spanish translation**

Access to suitable health facilities for all citizens is instrumental for achieving universal health and well-being across the population. However, vulnerable groups often miss out on health support due to lack of knowledge or opportunities to access facilities. The development of tailored programmes for reaching and providing health support to such groups more effectively would contribute to the inclusiveness of public health systems.

C4: Active travel and transit **Room 2A**

“A healthy city leads by example, with the social, physical and cultural environments aligned to create a place that is actively inclusive, and facilitates the pursuit of health and well-being for all.”

The quote above is from the Copenhagen Consensus of Mayors vision Healthier and Happier Cities for All (February 2018). In this vision, place occupies a pivotal role between planet and people, linking human, social and urban development together. This session allows cities to discuss place through the lens of active travel and transit.

C5: Promoting healthy and active environments **Room 2B**

The creation of built environments that promote active and healthy lifestyles is a complex task that requires a multitude of disciplines to come together to develop a shared understanding of the impact of the built environment on health. It also requires close cooperation between the public sector and partners from the academic and private sectors to achieve well-informed policies and interventions

C6: Improving the health of children through urban design **Room 3A**

The United Nations Convention on Right of the Child has enshrined a child's right to play, but often a lack of suitable spaces for children to play outdoors unattended means that this right is being restricted. In addition, children are often overlooked when planning and designing the urban environment despite the importance of outdoor play for children's healthy development. Urban environments that encourage playful activities not only contribute to children's health but can also improve the health of adults, particularly older people.

C7: Inspiring change: Inclusive arts for health and well-being **Room 3B**

Participation in cultural activities can promote the well-being of people by increasing social inclusion, enhancing self-confidence and developing skills that are useful for the employment market. These outcomes can all act to improve health and well-being. Participation in cultural activities can be particularly helpful for vulnerable people, who might face challenges with social participation and skills development.

8.30–10.00: Plenary 3: Planet and Prosperity

Auditorium

Russian, Spanish and Turkish translation

This plenary session will be built around the Planet and Prosperity themes of the Copenhagen Consensus of Mayors: Healthier and Happier Cities For All. The session will link People, their health and well-being to the Places where they live, and to the Planet, which provides the resources and support on which our very existence depends. In this complex and intertwined context, many European Healthy Cities are at the forefront of addressing themes such as the circular economy and the re-thinking of urban spaces in an effort to turn the urban challenges of the 21st century into opportunities that can deliver multiple benefits. This inspiring work can integrate different dimension of the urban political agenda, bringing together important policy objectives related to health, environment, quality of urban life and efficient use of resources, and this session will aim to explore that.

Co-chair: Katrina Godfrey, Permanent Secretary, Department for Infrastructure, Northern Ireland, United Kingdom

Co-chair: tbc

Circular economy: opportunities and challenges for cities (to be confirmed)

Parallel Session D- 14.30 – 16.00 Wednesday 3 October 2018

D1: Empowering people for improved mental well-being: collaborative approaches **Room 1B**

People who are emotionally healthy are generally better able to cope with life’s challenges, build strong relationships and recover from setbacks. Empowering people to support their emotional well-being and to become more resilient to adversity, trauma and stress is key to preventing mental health problems from developing.

Health in all policies, urban green spaces and health: the GREENH-City research project with the members of the French Healthy Cities Network

D3: Young people's personal journeys: NEET (not in education, employment or training) solutions **Hall 2B - Spanish translation**

The growing reliance of developed economies on the service sector means that young people not in education, employment or training (NEET) find it increasingly difficult to sustain themselves and fully participate in society. The social exclusion and marginalization of young people is not only a financial burden for society but leads to a human cost that is much more difficult to address.

Chair: Danny McQuillan, Belfast, Northern Ireland, United Kingdom
Discussant: Justine Daly, Belfast, Northern Ireland, United Kingdom

D4: Co-production: enhancing sustainable communities **Room 2B**

There is growing acknowledgement that building healthy and sustainable communities requires collective action. A challenge remains in identifying inclusive models of governance in which citizens move away from being passive recipients of service delivery to being truly engaged in the decision-making processes. Co-production offers a framework for effecting such a shift in governance models.

D5: Taking action: hard-to-reach groups **Auditorium - Turkish translation**

Public health-care systems around the globe have often been established for the purpose of providing good-quality care to all citizens, without due attention to gender, social or economic background. Some groups of people experience more difficulties in accessing health care than others. This deficit in health-care provision is particularly evident for immigrants, who often face social and economic marginalization and might lack knowledge about the structure of public health-care systems. These three case studies explore different approaches to increasing access to health care for hard-to-reach groups such as immigrants.

D6: Equity and inclusion: urban, regional and national initiatives **Room 3A**

The emergence of health inequalities within society can often be linked to the existence of structural social inequalities, particularly factors that make it difficult for deprived people to escape deprivation. Addressing these factors should therefore act as a prerequisite for tackling health inequalities. This is particularly important in early childhood services which, if successful, can contribute to reducing the risks for children from deprived backgrounds developing a poor health record in early life. These three case studies explore initiatives at various governance levels that seek to address social inequalities among children to provide them with increased future life opportunities.

D7: Engagement and prevention strategies: measuring the impact **Room 3B**

Key elements that underlie any attempt to make public health strategies more effective are the development and understanding of the population's health needs and the involvement of target groups in the planning of public health interventions. However, challenges remain around developing a set of indicators that reliably measure the impacts of community engagement models.

These four case studies explore various community engagement models in the health sector and attempt to identify a practical framework for measuring their impact.

Parallel Session E - 16.30 – 18.00 Wednesday 3 October 2018

E1: Investing in early years: collaborating for better outcomes for children
Room 1B

Early childhood years are hugely significant in terms of safeguarding children's health and well-being and their academic and social development in later life. The quality of the education settings and home learning environments, including the support parents provide, can strongly influence the development outcomes of children. Investing in good-quality services for children, parents and caregivers is therefore of paramount importance for increasing levels of well-being.

E5: Natural capital: promoting environmental sustainability **Room 2B**

Natural capital can be defined as all the “elements of nature that directly and indirectly produce value or benefits to people” (United Kingdom Natural Capital Committee). The relationship between human society and natural spheres is often seen in terms of resources, but policy-makers are becoming acutely aware of the risks involved in depleting our natural environment beyond a limit from which it cannot recover.

Abstract 16, Oslo, Norway & Copenhagen, Denmark: Ingvild Little, Charlotte Lisager Petersen (two speakers)

Scandinavian partnership to strengthen the soft skills of public health change agents

E7: Building resilience: tools and self-help **Room 3A**

Resilience refers to a person's capacity to handle difficulties, demands and pressure without experiencing negative effects. Strong social networks and high levels of mental well-being generally make people more resilient. The promotion of resilience among the population can help to make people less dependent on public health facilities and can therefore help to unburden public health systems.

8.15 Thursday, 4 October 2018

8.15 – 10.00: Plenary 4: People and Place

Auditorium

Russian, Spanish and Turkish translation available

Harmony Choir, North Belfast Schools

Harmony North project aims to bring together ten choirs from North Belfast to sing a commissioned piece.

This plenary session will be built around the People and Place themes of the Copenhagen Consensus of Mayors: Healthier and Happier Cities For All. It will explore the role of cities in contributing to the sustainable future for both people and our places within which we live, that is called for by the United Nations 2030 Agenda for sustainable Development. It will focus on the crucial role that food and food systems play within this future. Food is crucial for societies and communities, and is a cross-cutting theme throughout the work of the WHO European Healthy Cities Network, central to improving health and well-being and reducing inequalities. Reliable, sustainable, and ecological food systems are crucial in ensuring both health and food security, preparing societies and communities for shocks, and reconciliation, and contribute to building societal cohesion and resilience.

Chair: tbc

Co-chair: Peter May, Permanent Secretary, Department for Justice, Northern Ireland

Keynote and panel

Food, justice and sustainability - healthy cities thriving communities

F1: Healthy city stories: around the world 2
Hall 2B, Turkish translation

Successful healthy cities have strong political leadership, are centres of good practice and are in a unique position to learn and share knowledge, insight and inspiration in a spirit of solidarity. Healthy cities share a vision for urban health that puts people and their health and well-being at the centre of all policies and actions. This is the second session of three sessions that highlight the progress and impact that has been achieved as part of the last 30 years of the Healthy Cities programme.

Chair: Karen Casson, Belfast, Northern Ireland, United Kingdom
Discussant: Geoff Green, Sheffield, England, United Kingdom

Abstract 341, Belfast, Northern Ireland, United Kingdom: to be confirmed
Belfast: sustaining and celebrating 30 years of healthy cities

F2: Entry points for healthy places: architecture and urban design
Room 1B

“A healthy city leads by example, with the social, physical and cultural environments aligned to create a place that is actively inclusive, and facilitates the pursuit of health and well-being for all.”

The quote above is from the Copenhagen Consensus of Mayors vision Healthier and Happier Cities for All (February 2018). In this vision, place occupies a pivotal role between planet and people, linking human, social and urban development together.

This session allows cities to discuss ‘place’ the concept of ‘entry points’ in architecture and urban design for healthy places.

Chair: John Ashton, Senior Adviser, WHO European Healthy Cities Network
Discussant: Geraint Ellis, Belfast, Northern Ireland, United Kingdom

Abstract 126, Bristol, England, United Kingdom: Marcus Grant
Healthy place-making: finding our strengths

Abstract 59, Bristol, England, United Kingdom: Emily Prestwood
Healthy buildings for a healthy city: is the public health evidence base informing current building policies? The implementation gap in the United Kingdom today

Abstract 200, Bristol, England, United Kingdom: Louis Rice
Healthy architecture: a conceptual framework for the integration of public health into the architectural profession

F3: Giving children a voice: successful tools
Room 2A

Engaging children promotes citizenship and develops ideas that provide the opportunity to develop projects on issues that directly affect their lives and in a way that addresses their needs. Cities use creative methods of engagement, including digital tools, to develop proposals that will improve the environment, lifestyles and citizenship. Schools play a key role in promoting citizenship.

Chair: Brian Nelson, Belfast, Northern Ireland, United Kingdom
Discussant: Diane McIntyre, Belfast, Northern Ireland, United Kingdom

Abstract 205, Belfast, Northern Ireland, United Kingdom: Chris Karelse
Healthy Places, Healthy Children – a teaching resource to support a child-led, creative approach to designing healthy and child-friendly places and structured engagement with local decision-makers to affect change

F4: Health literacy: a means to improve health outcomes **Hall 2A - Russian translation**

Health literacy is being developed by a number of healthy cities, with many working to establish health literacy levels among various population groups, particularly those that experience inequalities. This session considers the approaches being used, the level of health literacy knowledge among professionals and plans in progress to improve health literacy levels.

*Chair: Ivana Draholova, Brno, Czech Republic
Discussant: Bernadette Cullen, Belfast, Northern Ireland, United Kingdom (to be confirmed)*

F5: Defining indicators: multisectoral approaches to data collection **Room 2B**

The creation of reliable databases lies at the core of any effort to develop informed policy responses to complex societal challenges. The quality and range of the data collected often dictate the effectiveness of indicators adopted as part of public health strategies. Much can be gained from combining quantitative and qualitative datasets that provide information on a range of social determinants of health.

F6: Collaboration: central to developing successful and inclusive city health policies **Auditorium - Spanish translation**

Strategic city plans are enhanced through the collaboration of sectors from across the city and through engagement with residents. Increased participation in actions being delivered by healthy cities is in evidence when users are enabled to participate in planning processes and in decisions around agreed actions. Implementing policies to improve health and well-being also requires participatory planning.

work*

F7: Climate change: risk assessment and positive responses Room 3A

Since the majority of the world's populations live in urban areas, climate change is increasingly a concern, with many cities focusing on developing adaptive response plans to minimize key urban risks and carrying out research with those who experience social and structural inequalities and who are most likely to experience the more negative effects of climate change. The Global Covenant of Mayors for Climate and Energy offers the opportunity for an intersectoral strategy creating healthy, sustainable and resilient environments.

Parallel Session G - 14.00 – 15.30 Thursday 4 October 2018

G1: Honing your professional skills: supporting cities through engaging with healthy cities research
Hall 2A - Russian translation

This highly interactive workshop supports participants in getting more value from research for healthy cities and other cities in the network. Participants will also look at the valuable experience that they have, as practitioners, for research and knowledge development. The workshop will help participants develop your own skills and confidence in reviewing new research.

Facilitator: Marcus Grant, Senior Adviser, WHO European Healthy Cities Network

G2: Healthy place-making in the face of challenge
Hall 2B - Turkish translation

The scope of this session will be to explore approaches to health and well-being through place in tough and unusual circumstances: to identify good practices and hear from others and review what has worked and why

Chair: Chris Karelse, Belfast, Northern Ireland, United Kingdom
